Dark Is The Night For All
Pal: "Some people think it's about a break-up, but it's actually the opposite. It's about breaking away, taking a risk. As it says in the lyrics, 'We need to celebrate the mystery.' In music, as in life, the more you de-mystify it, the more you clarify ... the more you lose the magic. Music, lyrics and films that speak too 'clearly' end up saying nothing in the language of the heart."

Morten: "This powerful track should pound across fifty states. I love the animal feel of it. It stands out as one of the strongest 'band' songs we have."

Magne: "It's a song about departure. To embrace something new you have to let go of the old. We did ... and it worked."

Pal: "We wrote this while on tour in South America. On the road we'd use sound checks to work on new material."

Cold As Stone
Pal: "With 'Cold As Stone' we kept everything from the original take ... vocals and all. When we were laying down the basic tracks, we would set ourselves up on this huge sound stage, the size of an airplane hangar. We'd work on getting the sound right during the day and then come back and attempt the actual recording at the end of the evening. 'Cold As Stone' was one of the first songs we did and it felt like a cornerstone ... something to build on. It set the tone for the rest of the album."

Morten: "The song has a primal feel. It's important, I think, for any band to fight technicalities and let the instincts run the show. This is a vital track for the band and it's interesting that we have ended up using a version we cut live. I'm very proud of this track."

Angel In The Snow
Morten: "This is one of my favourites on the album. It's a song you just want to hug."

Locust
Morten: "This song is a film. It blew me away ... I'm still out there."

Pal: "Most of our songs work better with the lights turned out. This is definitely one of them ... it's probably my favourite on the album."

Magne: "Making a record is a lot like mixing colours on a canvas. This track has a rich texture and a very abstract solo section."

Lie Down In Darkness
Pal: "I've always found it inhibiting to do guitar overdubs in the studio, with everybody standing around. So halfway through recording this album, I took a few tapes to New York, booked a studio at random with an engineer I'd never met before and went in to try and blow him away. It was great! I felt like I was fifteen again, at my first studio session. It's a method that worked on all these songs, including this one."

Magne: "We discovered the sound of the Chamberlain on this record. It's a wonderful vintage keyboard that kept overheating. I'm in love."

How Sweet It Was
Morten: "This one was conceived, I believe, after a Ray Charles concert in Norway. It's full of undercurrents and is a very important song to me, although I can't really explain why."

Pal: "I like this one a lot. It's both slow and fast at the same time. Mags plays great piano and I also like the fact that no two verses are alike. I wrote the lyrics on my honeymoon and got the title from a candy store across the street from my hotel."

Lamb ToThe Slaughter
Morten: "A rare piece about deprived innocence. It's got a strong melody and possibly the best riff on the album."

Magne: "This is the story of my life ... a very heavy waltz."

Between Your Mama And Yourself
Pal: We did this one just to clear the air. It was fun to write and fun to play. With the lyrics I had a sort of 'Graduate' scenario in mind ... a girlfriend with a good-looking mother."

Memorial Beach
Pal: "Memorial Beach is the name of an actual place near Sarasota, Florida. We were just driving around and happened to pass by and the name got me started. The tune itself actually told me where to go with the words."

Magne: "I like the dialogue between the guitar and the piano - a nice simple feel. It reminds me of the music Pal and I used to play a long time ago."

Morten: "I feel I've known this song all my life. It's got every reason to be the title track ... for me, it's a classic."
What would you say about a band that had sold over twenty million albums worldwide, has had seventeen Top 20 international hits and has become the most popular band in the history of South America?

What would you say about a band that has released four critically acclaimed studio albums, won eight MTV awards, a Grammy nomination for Best New Artist and a BMI award for having a single song played on the radio over a million times?

What would you say about a band that has packed stadiums around the world during near-continuous touring over the past seven years, playing for one and a half million fans during a single month and landing in the Guinness Book of Records for the largest paid attendance (198,000) for a single concert?

What would you say about a band whose music spans the divide between accessible pop and adventurous, cutting edge rock 'n' roll ... that has consistently created some of the most intriguing and original music of the past decade ... that's proven that music is, indeed, the universal language!

If you were to say "a-ha" you'd not only be expressing surprise over this extraordinary list of accomplishments, you'd also be naming the band.

Over the course of their stellar career, a-ha has, in fact, continued to surprise fans and critics alike with music that reaches beyond borders and boundaries to touch universal themes with a common musical chord. The group's run of smash singles, sold out concert halls and record-breaking receipts is indeed the stuff of musical history. But what counts, finally, is the sound itself and, on that account, a-ha is clearly in a class of one.

It's a standing about to be immeasurably enhanced by the arrival of Memorial Beach, a-ha's fifth career album and a collection of ten original songs that clearly places the trio at the forefront of today's music. Featuring a-ha's haunting new single, "Dark Is The Night," along with such standout tracks as "Cold As Stone," "Lie Down In Darkness" and the title track, Memorial Beach was produced by the group with the able assistance of David Z, best known for his work with Prince, Fine Young Cannibals, Bodeans and others.

The result should convince American audiences of what music fans worldwide have known for some time; a-ha makes music that matters.

It was in the early eighties that Norwegian-born Mags, Morten and Pal first joined forces to create a unique musical partnership. Relocating in London, they began performing locally and recording a series of demos that eventually caught the attention of Warner Bros. Records.

The group's debut outing for the label, 1985's Hunting High And Low highlighted both the group's seamless ensemble playing and captivating vocal harmonies. The album featured the world class hit, Take On Me," which also established a-ha as visual pioneers with dazzling video that blended fantasy and reality. Before it was all over, the song had streaked to the top of the charts everywhere including America, where it quickly became a radio staple.

From the out-of-the-box success of their debut single and album, a-ha embarked on an extensive round of international touring, bringing their electrifying stage show to audiences on virtually every continent.

Among the most responsive fans anywhere were those of South America, where a-ha has become a household name from the Amazon to the Andes. The group has racked up no less than 14 number one songs in almost every Latin American nation, and, for five consecutive years, saw at least one of their albums in the Top 5 at all times. It was in Rio that they broke the Guinness attendance record with a massive outdoor concert and at the University of Santiago in Chile, there is even a course offered in the band's music.

Not bad for three lads from the frozen north, but a-ha had always been about making music with an international flair. From 1986 to 1990, they released three more best-selling studio albums, Sos, Stay On These Roads (1988) and East Of The Sun, West Of The Moon (1990). They also found time to write and perform the theme for the James Bond film The Living Daylights and released, in 1991, a long-overdue greatest hits package titled Headlines And Deadlines: The Hits Of a-ha.

But a-ha is also concerned with more than their next hit single or sold out concert tour. In contrast with other, more publicity-minded stars, the threesome have been quietly, but effectively, throwing their weight behind a number of crucial environmental causes, including investing in the development of solar cars and the purchase and preservation of Brazilian rain forests. They have also performed at a number of events benefiting ecological awareness.

Following their hugely successful South American tour of last year, a-ha began laying the groundwork for a new album. Everything from writing new songs - a task handled primarily by Pal - to selecting a producer was done with an overriding goal in mind. "People in the States know us mainly for 'Take On Me,'" explains Mags. "This time around we want to show them what else we can do."

"We've come a long way musically since that time," interjects Pal. "We feel we're ready to present something fresh and new to America."

"It can be very difficult to get noticed in this country," agrees Morten."There's so much music ... so much competition. But we're determined, on this record, to do here what we've done in the rest of the world. And we think this is the album to do it with."

There's no doubt about that. Memorial Beach is not only the strongest, most assured and appealing album of a-ha's career, it is an offering certain to take the band over the top here, there and everywhere.

Didn't know what was waiting for me there.
